

Passion with Confidence

Enabling full control on the balance between 3D and 2D work, ArchiCAD 11 lets you make the most of your team's expertise, tightly control your designs and be confident that the project documentation is created with unprecedented level of control, faster than ever, and in unparalleled quality.

Virtual Trace™

Providing tighter control, better coordination and better integration of design teams, this Industry first innovative technology enables simultaneous development of the 3D model and 2D documents with full coordination and continuous visual feedback.

Visual Compare

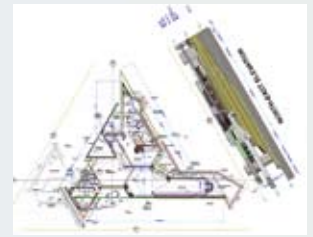

The ultimate solution for architects to efficiently control coordination of models, views and documents. With Visual Compare you have the confidence that all project documents are synchronized and any differences will be easily tracked.

Interior Elevations

Boost productivity and ensure complete coordination with the new dedicated Interior Elevations tool. As live views of the model, Interior Elevations are continuously synchronized and up-to-date.

Worksheet Tool

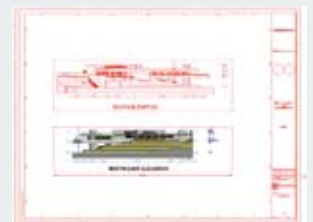

Dramatically improve the design to production workflow. Using the Worksheet Tool you can smoothly transform your model views into highly detailed documents, create 2D documents from scratch or easily merge consultant data within the Virtual Building environment.

Use any document as a reference to your design

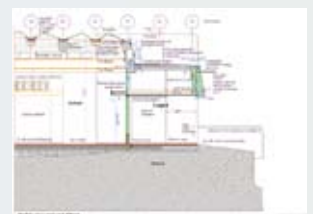

Drag the splitter to easily compare documents

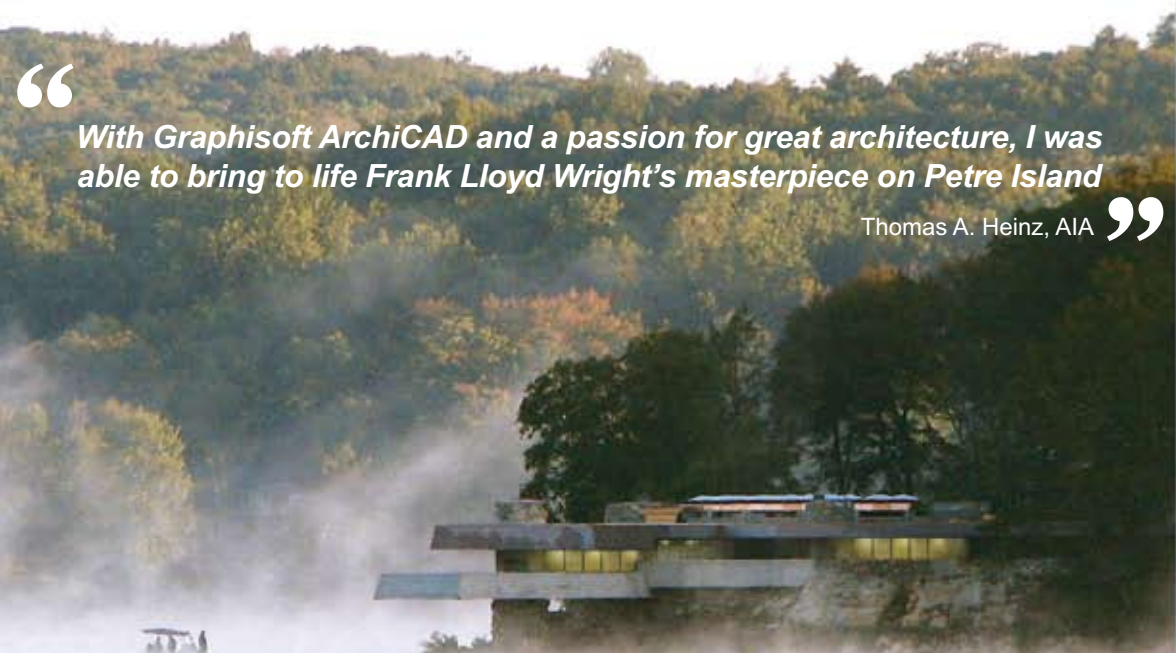

Efficiently Synchronize documents and layout

Enjoy automatic interior elevation layouting

Improve 3D - 2D workflow using worksheets

“

With Graphisoft ArchiCAD and a passion for great architecture, I was able to bring to life Frank Lloyd Wright's masterpiece on Petre Island

Thomas A. Heinz, AIA ”

More reasons for

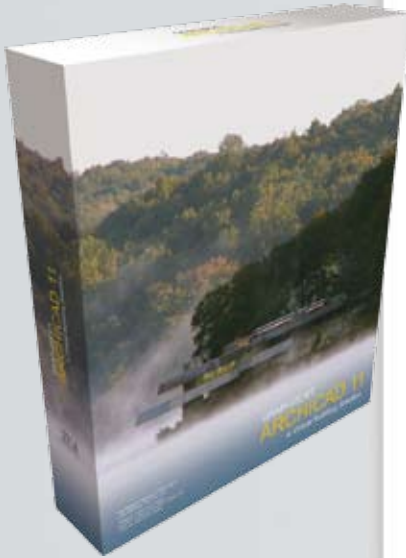

11

"ArchiCAD 11 Virtual Trace ability to combine two different views in one window dynamically is very powerful."

Erik Mickaten, Architect

"ArchiCad 11 addresses our firms concern for how junior staff can quickly, and independently, be trained to comprehend a virtual building model. With the aid of virtual trace they will develop an understanding of the 3-D modeling components in relation to a traditional 2-D set of design or construction drawings - a great benefit to our productivity"

Daniel Grandy, Anshen + Allen

"With ArchiCAD 11's Virtual Trace technology and the slider, we could see problems more easily in our project and lots of time has been saved!"

Mats Marquardt, AWL, Sweden

Complex Elements Geometry

More modeling freedom with new double slanted walls, curved complex walls and highly accurate quantity calculations.

Link Construction Elements to Stories

Speed-up modeling, prevent mistakes and simplify the scheduling processes with logical links between elements and stories.

Multistory Hotlinked Modules

Easily divide multistory buildings into smaller parts. Entire multistory buildings Hotlinked to site plan.

Enhanced Selection/Editing Feedback

Improved visual feedback with pre-selected and selected elements, moving elements in worksheets and pasted content.

Line Work & Fill Consolidation

Efficiently handle the process of cleaning up and fixing drawings, including an optimization process for 2D drawings from consultants.

Long File Names

Freedom to choose your naming convention with no character limitations.

Xref Layer Separation

Better control and management of Xref files and easier layer navigation.

PDF Net

Significantly enhanced output quality and direct interface smoothes PDF creation process.

Quantities of Individual Elements Components

Highly accurate calculations, even for the most complex projects, are now available in ArchiCAD 11's Interactive Schedules

Enhanced Drawing Marker

Faster and easier navigation in project documents and more efficient reference mechanism.

Uncut Line type

This new feature offers better control of the appearance of your documents with higher quality deliverables.

Enhanced Project Navigator

Enable faster navigation and better control over project documentation by separating all new view types.

Pen Sets in Views

Efficiently control the drawing set graphics with WYSIWYG and with separate and more flexible Pen Set control for each view.

And many more...
